## IoT Wireless Smart Farming Solutions / Sub 1G

How to reduce the farmers cost of producing and improving the quality of their produce through implanting sensor with wireless technology in their farms. Farmers can get the real time information from the farms to control or manage relative equipments. Besides, they can follow your planning working automatically.

## Air-SA Wireless Gateway

RS485 & AUX In / Out\_WW-1C28

RS485 & RS232\_WB-1628

- Air-SA Wireless data link provide stable data stream.
- High output RF power and high sensitivity provide more than 10 KM transmission distance.
- Air-SA supports the user defined of operating frequencies 410 ~ 525MHz / 862 ~ 1020MHz.
- Multi-Interface support RS-485 / RS-232 (WB-1628), RS-485 / Analog or Digital Input / Digital Output (WW-1C28).
- Flame Retardant.

Welcome to send your samples, drawings or to tell us your idea, and we will give you our quotation and sample ASAP.
