

Wireless Bridge Sensor Network

Wireless Bridge Sensor Network to evaluate bridge structure health. Wireless sensor nodes provide continuous synchronized performance and environmental (water level / water flow / seismic vibration) data to wireless sensor collector in real-time. Remote control center also collect synchronized data via wireless gateway.

NB-IoT Gateway RS485 & AUX In / Out WW-5C20

- NB-IoT Wireless data link provide stable data stream.
- Wide voltage operation for Industrial applications.
- Multi-Interface support RS-485 / Analog or Digital Input / Digital Output.
- AUX Power output for general purpose such as plug-in sensor, or other sub system.
- Resist the water, dust, temperature and shock and meet with the IP68 standard.
- Analog Input support 0~10V / 4~20mA / ADC.
- Digital Output support PWM / Latch Mode.

INFO

Welcome to send your samples, drawings or to tell us your idea, and we will give you our quotation and sample ASAP.
