

**RF Design and
Manufacturing Service**

ABOUT WINTEC

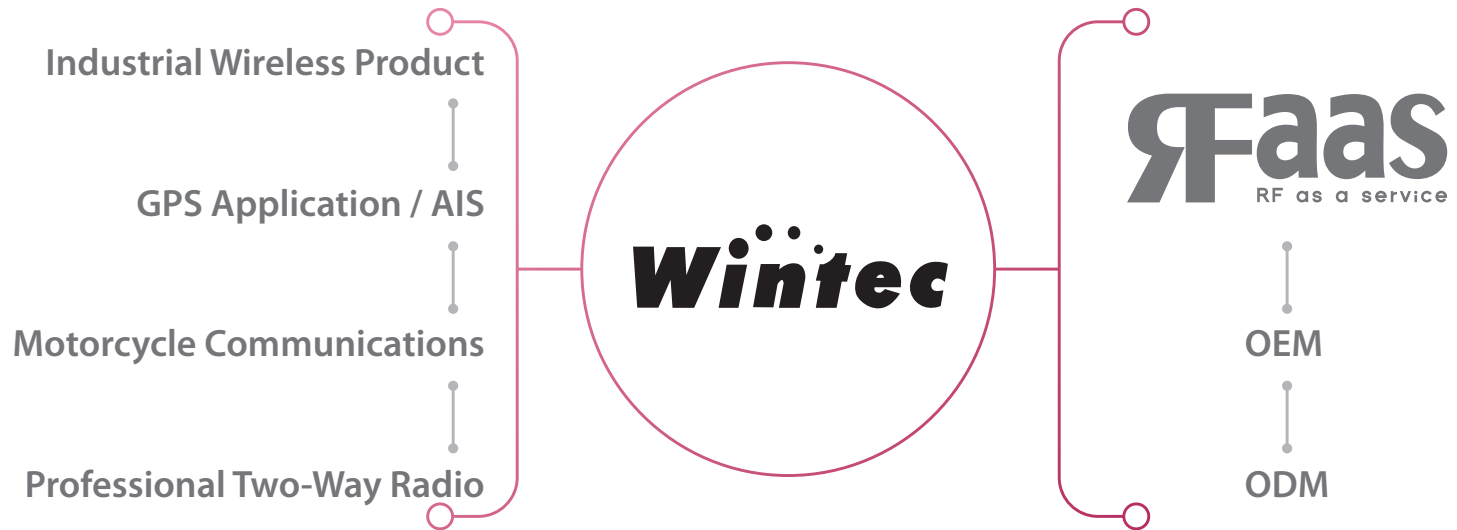

Wintec started as an electronics factory in 1991.

Wintec is an engineering-base company with extensive experience in product development. We have undergone a series of technical revolution with innovative researches in wireless application, and now become a well-established manufacturer with expertise in wireless technology.

Follow the trend of the Internet of Things (IoT) technologies, we established a new RFaaS(RF as a service) business unit and focus on the various wireless applications as NB-IoT / LoRa / Bluetooth / DALI lighting / AIS / RF Radio / GPS...and offer OEM / ODM service.

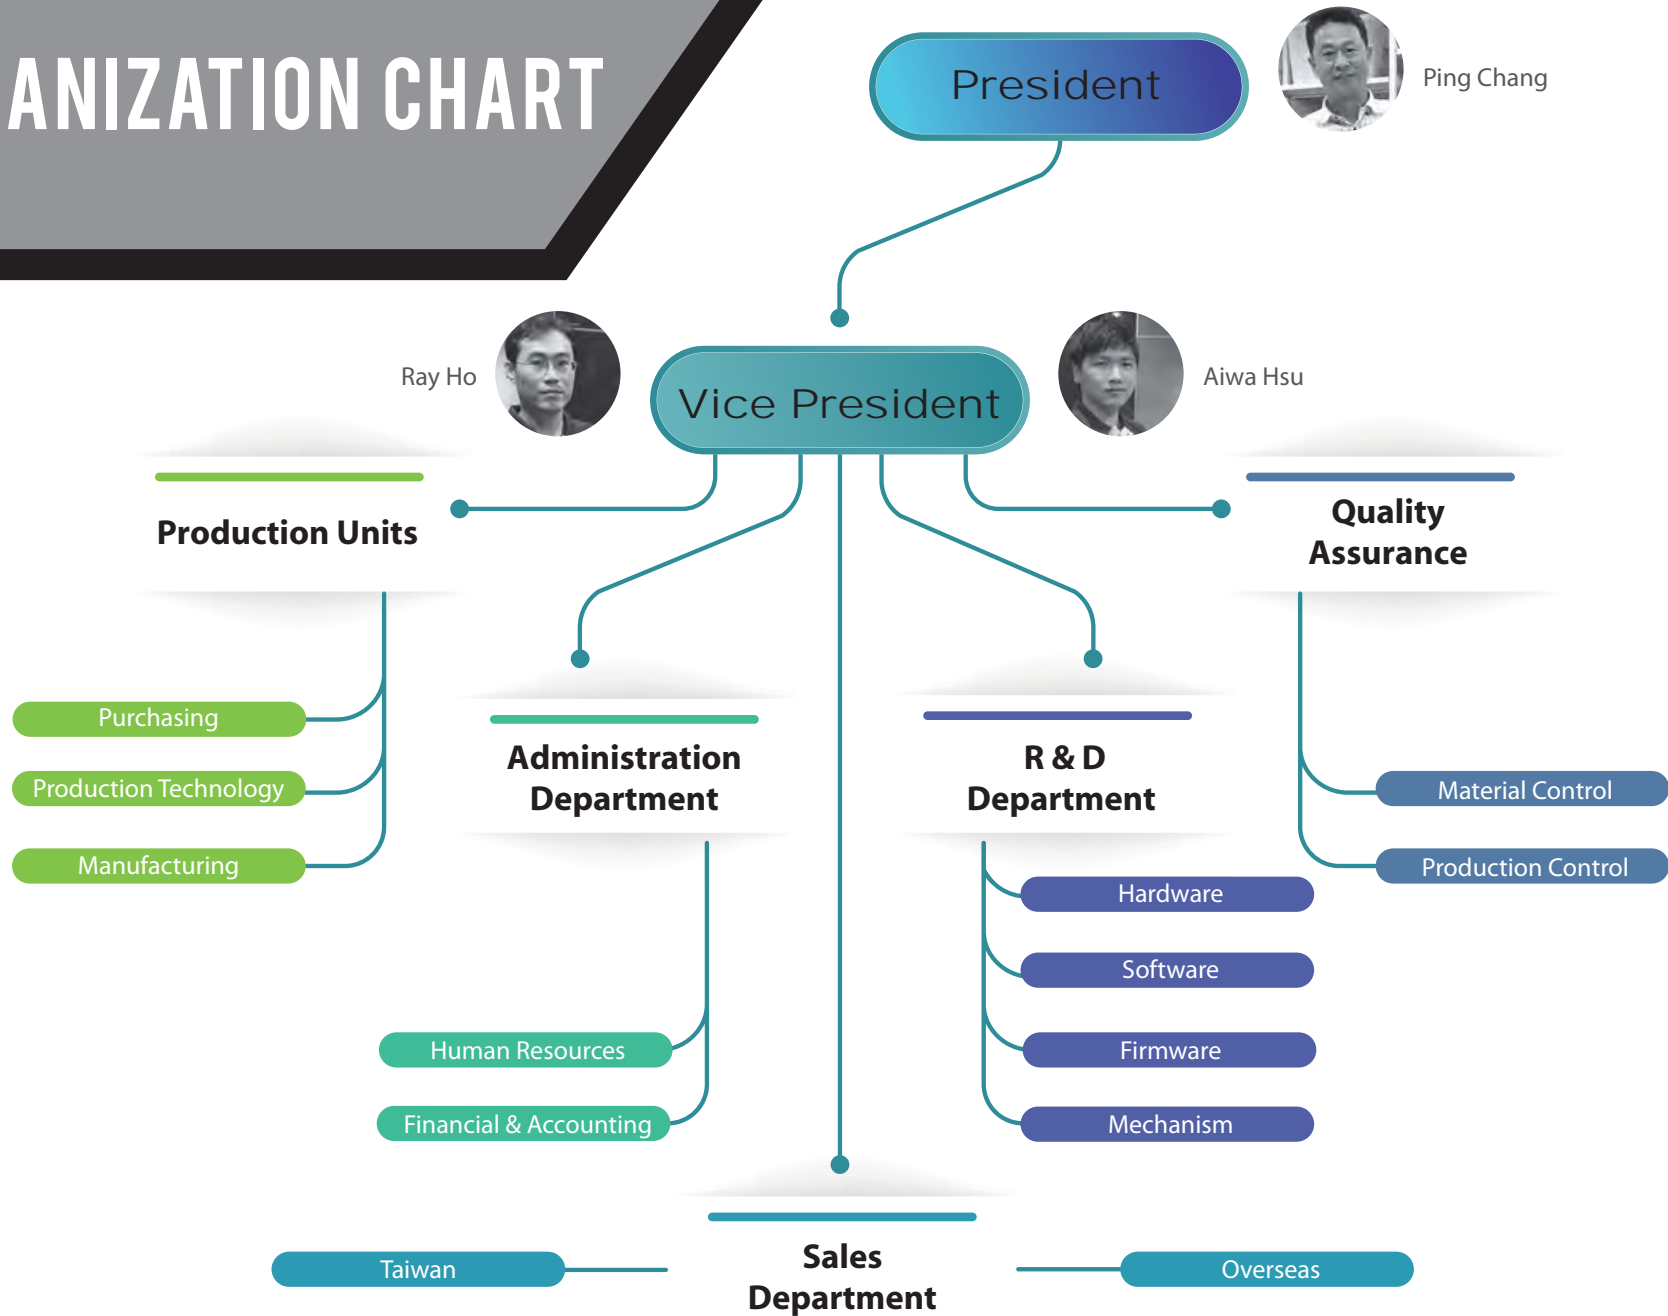

Wintec has established the belief of " Win by Technology " . The stable, special, and solid product features are our lasting pursuit goal in the process of development. Our company strategy emphasizes the " altruism " . Design the product and take the quality as our responsibility for the customer satisfaction.

BUSINESS CONTENT

Wintec offer a great range of wireless electronic products on the basis of OEM / ODM and customized service experiences as NB-IoT, GPS, RF Radio, LoRa, Bluetooth, AIS, DALI Lighting.

ORGANIZATION CHART

MANUFACTURING

Wintec's manufacturing factory is located in Zhonghe Dist., New Taipei City. We directly provide the customized service and receive feedback for the service quality, not through agencies.

We combined the modern technical management with 30 years of experiences and achieved ISO 9001:2008 certification in 2014. Products from the design and development, materials management, production and manufacture, sales process are in line with the international certification for quality control. "Taking the quality as our responsibility for the utmost client satisfaction" is our producing target. Each product is 100% tested to guarantee Failure-free, Defect-free and Loss-free. We insist strict and effective inspections in every workstation. Production management lead-in the Quality-Inspected Auto System, which is equipped with the precision instruments, specialized tested program and functional test. To ensure product quality and reliability in long-time using, we collect all tested database for instant analysis in the Quality-Control PC system and store data in products after system corrected parameters. Through a comprehensive series of KM quality system records to analyze all failure cases and propose improvement solutions, so that improve the defective-loss at the first moment. We implement the Quality-Control Standard System and make regular cycle tracking before delivering. Creating the most positive client recommendations and satisfactions with the perfect production.

ODM / OEM

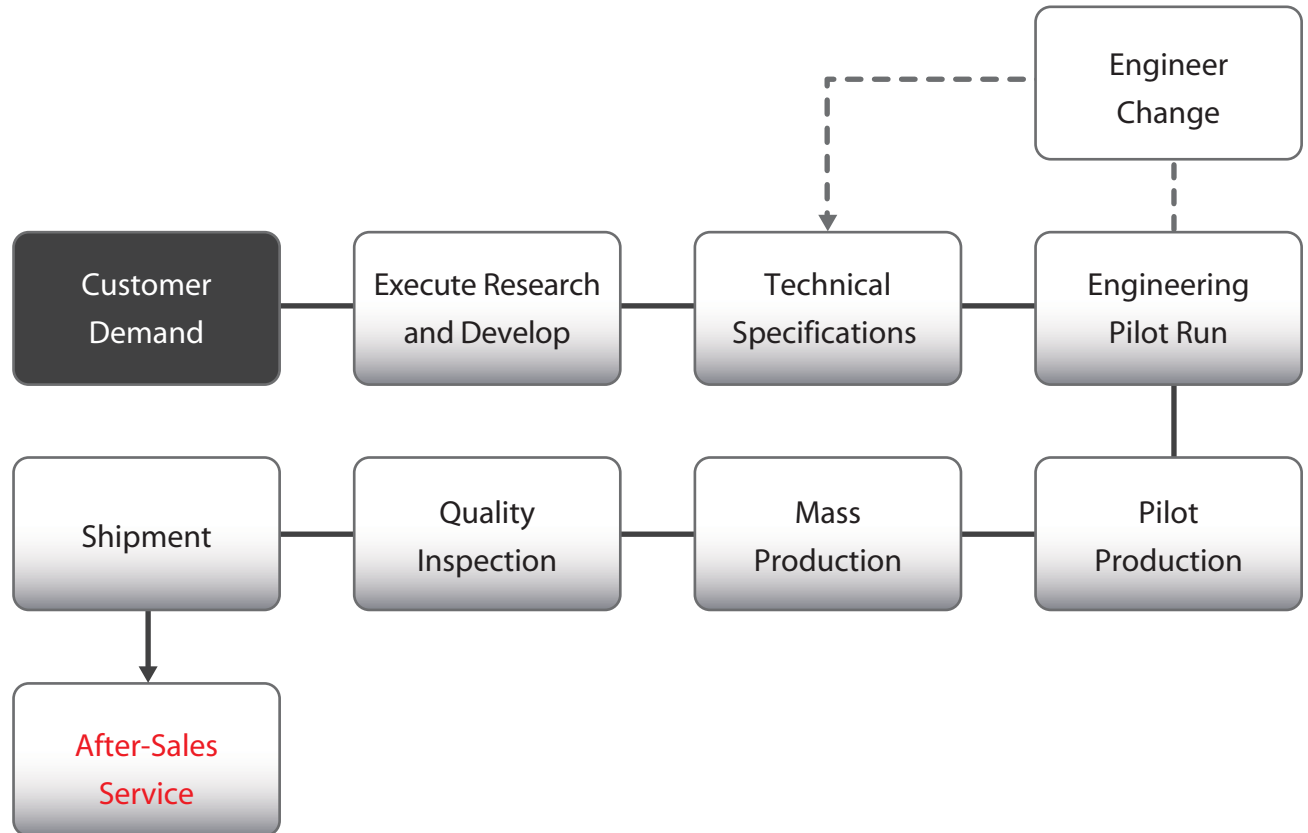

To meet the growth and prosper on the Internet of things (IoT) and the mobile peripheral wireless application, we have established RF wireless design service OEM / ODM business unit: RFaS (RF as a service).

With the specializations in wireless technologies, we actively help client to build comprehensive RF solutions that deliver NB-IoT, LoRa, Bluetooth, NFC, SUB 1G, wireless charging and a wide range of wireless electronic products.

RFaaS can provide a variety of wireless customized designs that based on client requests, integrate the wireless devices and various sensors.

To enable focus on the expertise field, inspire innovative value and develop more intelligent products, with RFaS design services, clients can easily integrate wireless application and sensors and seamlessly connect their product with IoT.

Bring your product together with the Internet of things, choose RFaS to achieve.

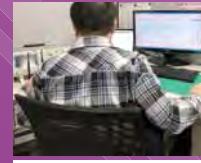

Our Technical Services

Hardware

- . Circuit Design
- . PCB Layout

Software

- . PC Software
- . Firmware

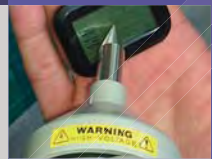

System Commissioning

- . Software and Hardware Integration
- . Human-Machine Interface Integration
- . Product Overall Image Design

Mechanism

- . Mechanism Design
- . Product Image Design

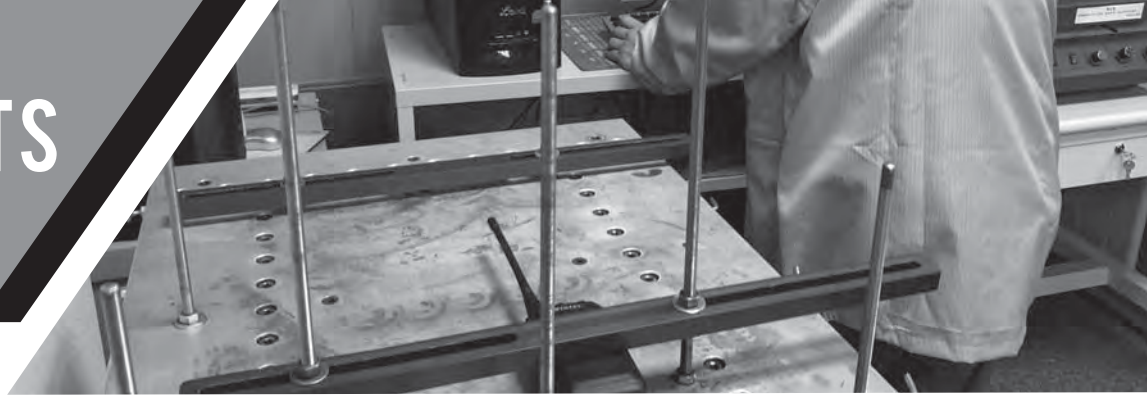

Quality Assurance

- . Incoming Quality Control
- . Process Quality Control
- . Out-Going Quality Control

EQUIPMENTS

Dependability Test & Quality is Supreme

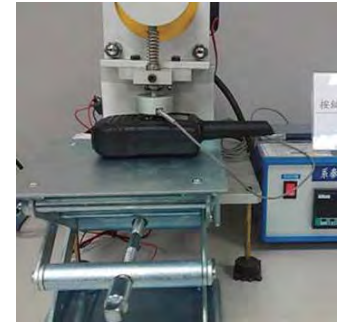

Shielding Room

2.5D Video Measuring System

Drop Test

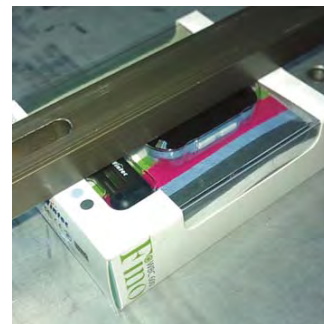

Key Switching Life Test

Waterproof

ESD Test

Vibration Test

Temp / Humidity Test
